

ENVIRONMENTAL POLICY

As a responsible organisation Henrob Limited understands that it will have an impact on the environment. Therefore our aim is to continually reduce the environmental impact of our operation.

In this respect our policy is:

- To assess how our activities interact with the environment, identify those which are significant and establish objectives and targets to drive continuous improvement.
- To encourage our employees to have a responsible approach to the environment, recycling materials and saving energy wherever possible
- Prevention of pollution through proper and responsible control of our operations and activities
- To comply with applicable Welsh Environmental Legislation and approved codes of practice
- To review our objectives and targets through regular management review
- To expect similar environmental standards from all suppliers and contractors

This Policy statement will be reviewed annually.
